Now we ask you to

Drive it only 5 miles and you'll never be satisfied with any other low-priced car

WHY do you suppose Chevrolet keeps repeating, in all of its advertising, "Drive it only 5 miles"? Very frankly, here's the reason: Chevrolet engineers have tried out all the various makes of cars in today's low-price field. They have compared performance—on rough roads, in traffic, over hills, through sand and mud and water! And they have proved, to their complete satisfaction, the same things that hundreds of thousands of Chevrolet owners are proving in their daily driving: How much more smoothly a car travels with genuine, fully-enclosed Knee-Action. How much more comfortably it handles, with shock-proof steering. How much more

restfully you ride, in a Fisher Body car. How much more safely you drive, with cable-controlled brakes. And how much finer performance and better economy are secured from an overhead-valve Six! In other words, Chevrolet engineers know for sure that the Chevrolet ride simply can't be matched by any other in the low-price field. They know it—hundreds of thousands of owners know it—and now we want you to know it too, before you make your final choice of a low-priced car. That's why we urge you to "Drive it only 5 miles"—and that's why we promise, "you'll never be satisfied with any other low-priced car."

The state of California has partially atoned for its attitude in recent lynch scandals. The kidnappers of William Gettle, wealthy oil man, were caught by California police without the payment of ransom, and in the record time of two days, given life sentences.

Quick meeting of justice is the impregnable strength of the law. In the handling of the Gettle case, the state of California has set a example to the rest of the nation.

April Crop Report

State crop reports now available.

For April state that farm work in that month was retarded by unfavorable weather conditions. The cold weather delayed the growth of the fall sown grains and pastures, but the frequent rains supplied an abundance of moisture, so that crops will make rapid strides with warm weather.
